Frequently Asked Questions

- **Why Maglev Fast Rail?** Maglevs are efficient, quiet and easy to fully separate from existing road and rail networks – and about the price of Labor's proposed new ring road.
- **Why Swap Tax?** Swapping tax makes fossil-fuel power, car use and excess water consumption more expensive. It drives the shift to renewables, sustainable transport and water conservation. *But overall there is no tax rise!*
- **No Tax Rise?** We are swapping spending and tax, not increasing it. There is simply no need to raise tax, we are taxed enough already.
- **Prescribe Heroin?** This is part of the health system in Switzerland, Germany, the Netherlands, Denmark and the UK. Trials are being carried out in Canada and Belgium. It means the users are not committing crimes or pushing drugs to new users. It means the crime syndicates have no market and there is less corruption and violence.

Projects to Cancel

- **\$6 Billion Plus North-East Freeway:** Maglev fast rail system instead.
- **\$4.5 Billion Footscray – Domain Metro:** Doncaster, Rowville, Mornington & Alamein rail lines instead.
- **\$2.5 Billion Westlink Freeway:** Level Crossing Bridges instead.
- **\$4.3 Billion Regional Rail Link:** New trains, trams, buses and other improvements instead.

(Maglev fast rail track costs ~\$M34 / km per twin track. This is less than Labor's road & rail tunnels.)
